Thursday: 8:30 – 3:30 pm

Get your Immunizations ON TIME, EVERY TIME!

Immunizations are among the most successful cost-effective public health tools available for preventing disease and death.

Getting vaccinated **ON TIME** not only helps protect children from developing serious diseases, it also helps protect entire communities by preventing and reducing the spread of these same diseases.

We encourage parents to learn about vaccine-preventable diseases, make sure their children start shots **on time**, and stay on schedule. Adults and older children also need to be sure to get recommended immunizations to protect themselves and their families. Talk with your family health care provider about getting immunized **ON TIME, EVERY TIME.** For more information about any vaccine or where to get immunizations, please call *St. Louis County Public Health and Human Services* at 1-(800)-450-9777.

St. Louis County Offers Immunizations To Those Who Qualify

Do you or your children lack health insurance? Does your insurance not cover immunizations or does it have high co-pays for immunizations? St. Louis County Public Health and Human Services offer immunizations by appointment for those who qualify. Call us to see if you or your children are eligible and to make an appointment: Virginia (218)749-0600, Hibbing (218)262-6000, Ely (218)365-8220, Duluth (218)725-5200, or toll free 1-800-450-9777.

Public Health Nursing Programs and Services

We work to improve community health through:

Women Infants and Children (WIC)- provides special foods and nutrition education to pregnant and breastfeeding women, infants and children to age five.

Superior Babies- Comprehensive education and support for pregnant clients with chemical use issues from a public health nurse and chemical health social worker.

Child & Teen Checkups- Includes a physical exam, development check, immunizations, health education, vision and hearing check, lab tests and a nutrition check for children and teens age 2 weeks through 21 years.

Nurse-Family Partnership (NFP)- seeks to improve each mother's chance for a healthier birth, improve the baby's health, facilitate the child's growth and development and support the mother's life and health.

Immunizations- Childhood and adult immunizations are available at day and evening clinics each month. Get information about local immunization clinics and other resources.

Community Health Promotion- Community assessment, education and programming to improve health. Expertise is offered to community groups to address local health concerns
